Summary

I am currently pursuing advanced training in IT DevOps and security, actively enrolled in AZ104, AZ500, and SEC + courses. I also showcase my UX development skills through my professional portfolio site, located at <http://mattgo.dev>.

As a seasoned IT support professional, security engineer, and UX developer, I am well-versed in bridging the gap between software development and design. Leveraging modern best practices, I strive to craft top-notch user experiences that exceed expectations.

With a robust background in IT fundamentals, software design, development, and testing, I am eager to contribute my technical, analytical, and programming skills to a challenging role as a security engineer. My in-depth understanding of user experience design also enables me to effectively anticipate and address user needs in the context of IT and security.

Over the course of my career, I have participated in more than 20 successful projects, spanning a wide range of fields, including front-end development, UI/UX design, game design, motion graphics, and blockchain technology. In recent years, I have deepened my expertise in DevOps and security, dedicating myself to daily learning and staying abreast of emerging technologies and trends, such as cybersecurity, AI/ML, the Metaverse, and cutting-edge programming languages and frameworks, such as Python and GO.

Overall, I am a highly motivated, intellectually curious, and results-driven professional, eager to take on new challenges and make a meaningful impact in the world of technology.
